

Supplier to the UK Nuclear Industry

ENTRUSTED TO DELIVER METAL SOLUTIONS

Company Overview

Kloeckner Metals UK is the UK division of Klöckner & Co and is the largest mill-independent multi metals distributor in the European and North American markets.

Our network of locations across the UK offer a comprehensive range of steel products and processing facilities. Backed by global purchasing strength and an extensive network of suppliers, we are able to source high quality products to suit a demanding sector like the nuclear industry.

Kloeckner Metals UK is a member of the Nuclear Industry Association (NIA) and of the British Constructional Steel Association (BCSA). We have been involved with the nuclear industry as a supplier for many years in the UK.

Kloeckner Metals UK is the supplier of choice for subcontractors and engineering companies specialising in the nuclear industry. We take quality seriously, BS EN ISO 9001:2008 accredited, we are also expanding our accreditation to ISO 14001:2004, you can be assured that excellence is at the heart of our mission statement.

Service

Service is part of our company name because we believe we can offer more than just metals.

In addition to our large volume of stock (60000t) we are able to offer a myriad of value added services, which enable us to supply first stage manufactured material to your specific requirements. These include the latest laser technology both 2D and 3D, along with the fabrication of plate girders and cellular beams through Kloeckner Metals UK | Westok business. Through our network we can supply your metal requirements on short lead times anywhere in the UK and abroad.

Total Metals Management

Allows you to focus on your internal efficiencies knowing your metals are already sourced and scheduled;

- Kloeckner Metals UK can source, schedule, stock hold and manage safely, all your metal requirements
- Materials can be ordered to your exact specifications and delivered to a location of your choice
- Certainty in quality, cost and lead time places you in control of your supply chain
- Dedicated point of contact responsible for each project
