

## **Product advisory notification.**

### **Product: Polyester Wipe-Board products.**

Notification to all customers purchasing pre-painted wipe-board product.

The product **WIPE-BOARD** has been designed to allow a clean wipe of the surface when wipe-board marker pens are applied.

However Kloeckner Metals UK cannot give a guarantee all wipe board marker pens on the market are suitable for application to this product, as Kloeckner and our suppliers have no control over the chemicals makeup and suitability of pens available and testing of all pen types is not viable.

Customers are therefore advised to test the Pen or Pens intended for use on a small area of the product prior to production or end use.

Please contact Kloeckner /OCS Quality with any issues relating to the above you may wish to discuss.
